INDUSTRIAL ACCIDENT STATISTICS, QUEENSLAND, 1968-69

Details of industrial accidents are extracted from claims for workers' compensation finalised or becoming three years old during the year 1968-69. They do not refer to accidents actually occurring within that period. This should be clearly borne in mind if comparisons with earlier periods are attempted. For further explanatory notes and definitions, see page 2.

During the year 1968-69, 38,255 claims for work injuries were finalised. These claims covered 701,396 days of lost time through temporary disability, in addition to 70 fatalities and 867 cases of permanent injury.

Males were involved in 35,148 cases of work injuries which resulted in 70 fatalities, 840 cases of permanent disability, and 34,238 cases of temporary disability. These latter cases caused 642,068 days of lost time, or an average of 18.8 days per case of temporary disability.

Work injuries to females (3,107) resulted in 27 cases of permanent disability and 3,080 cases of temporary disability. The temporary disability cases resulted in a loss of 59,328 days, or an average of 19.3 days per case.

For males, of the total days lost through temporary disability injuries (642,068 days), the greatest loss resulted from falls, with 177,627 days lost. This type of accident also recorded the highest average loss of time with 25.3 days lost per injury. Of the other types of accidents, striking or being struck by objects resulted in a loss of 157,214 days, with an average loss of 12.9 days per injury, and over-exertion in a loss of 142,525 days, or 23.5 days per injury. Over three-quarters of the days lost by females were also caused by these three types of accidents.

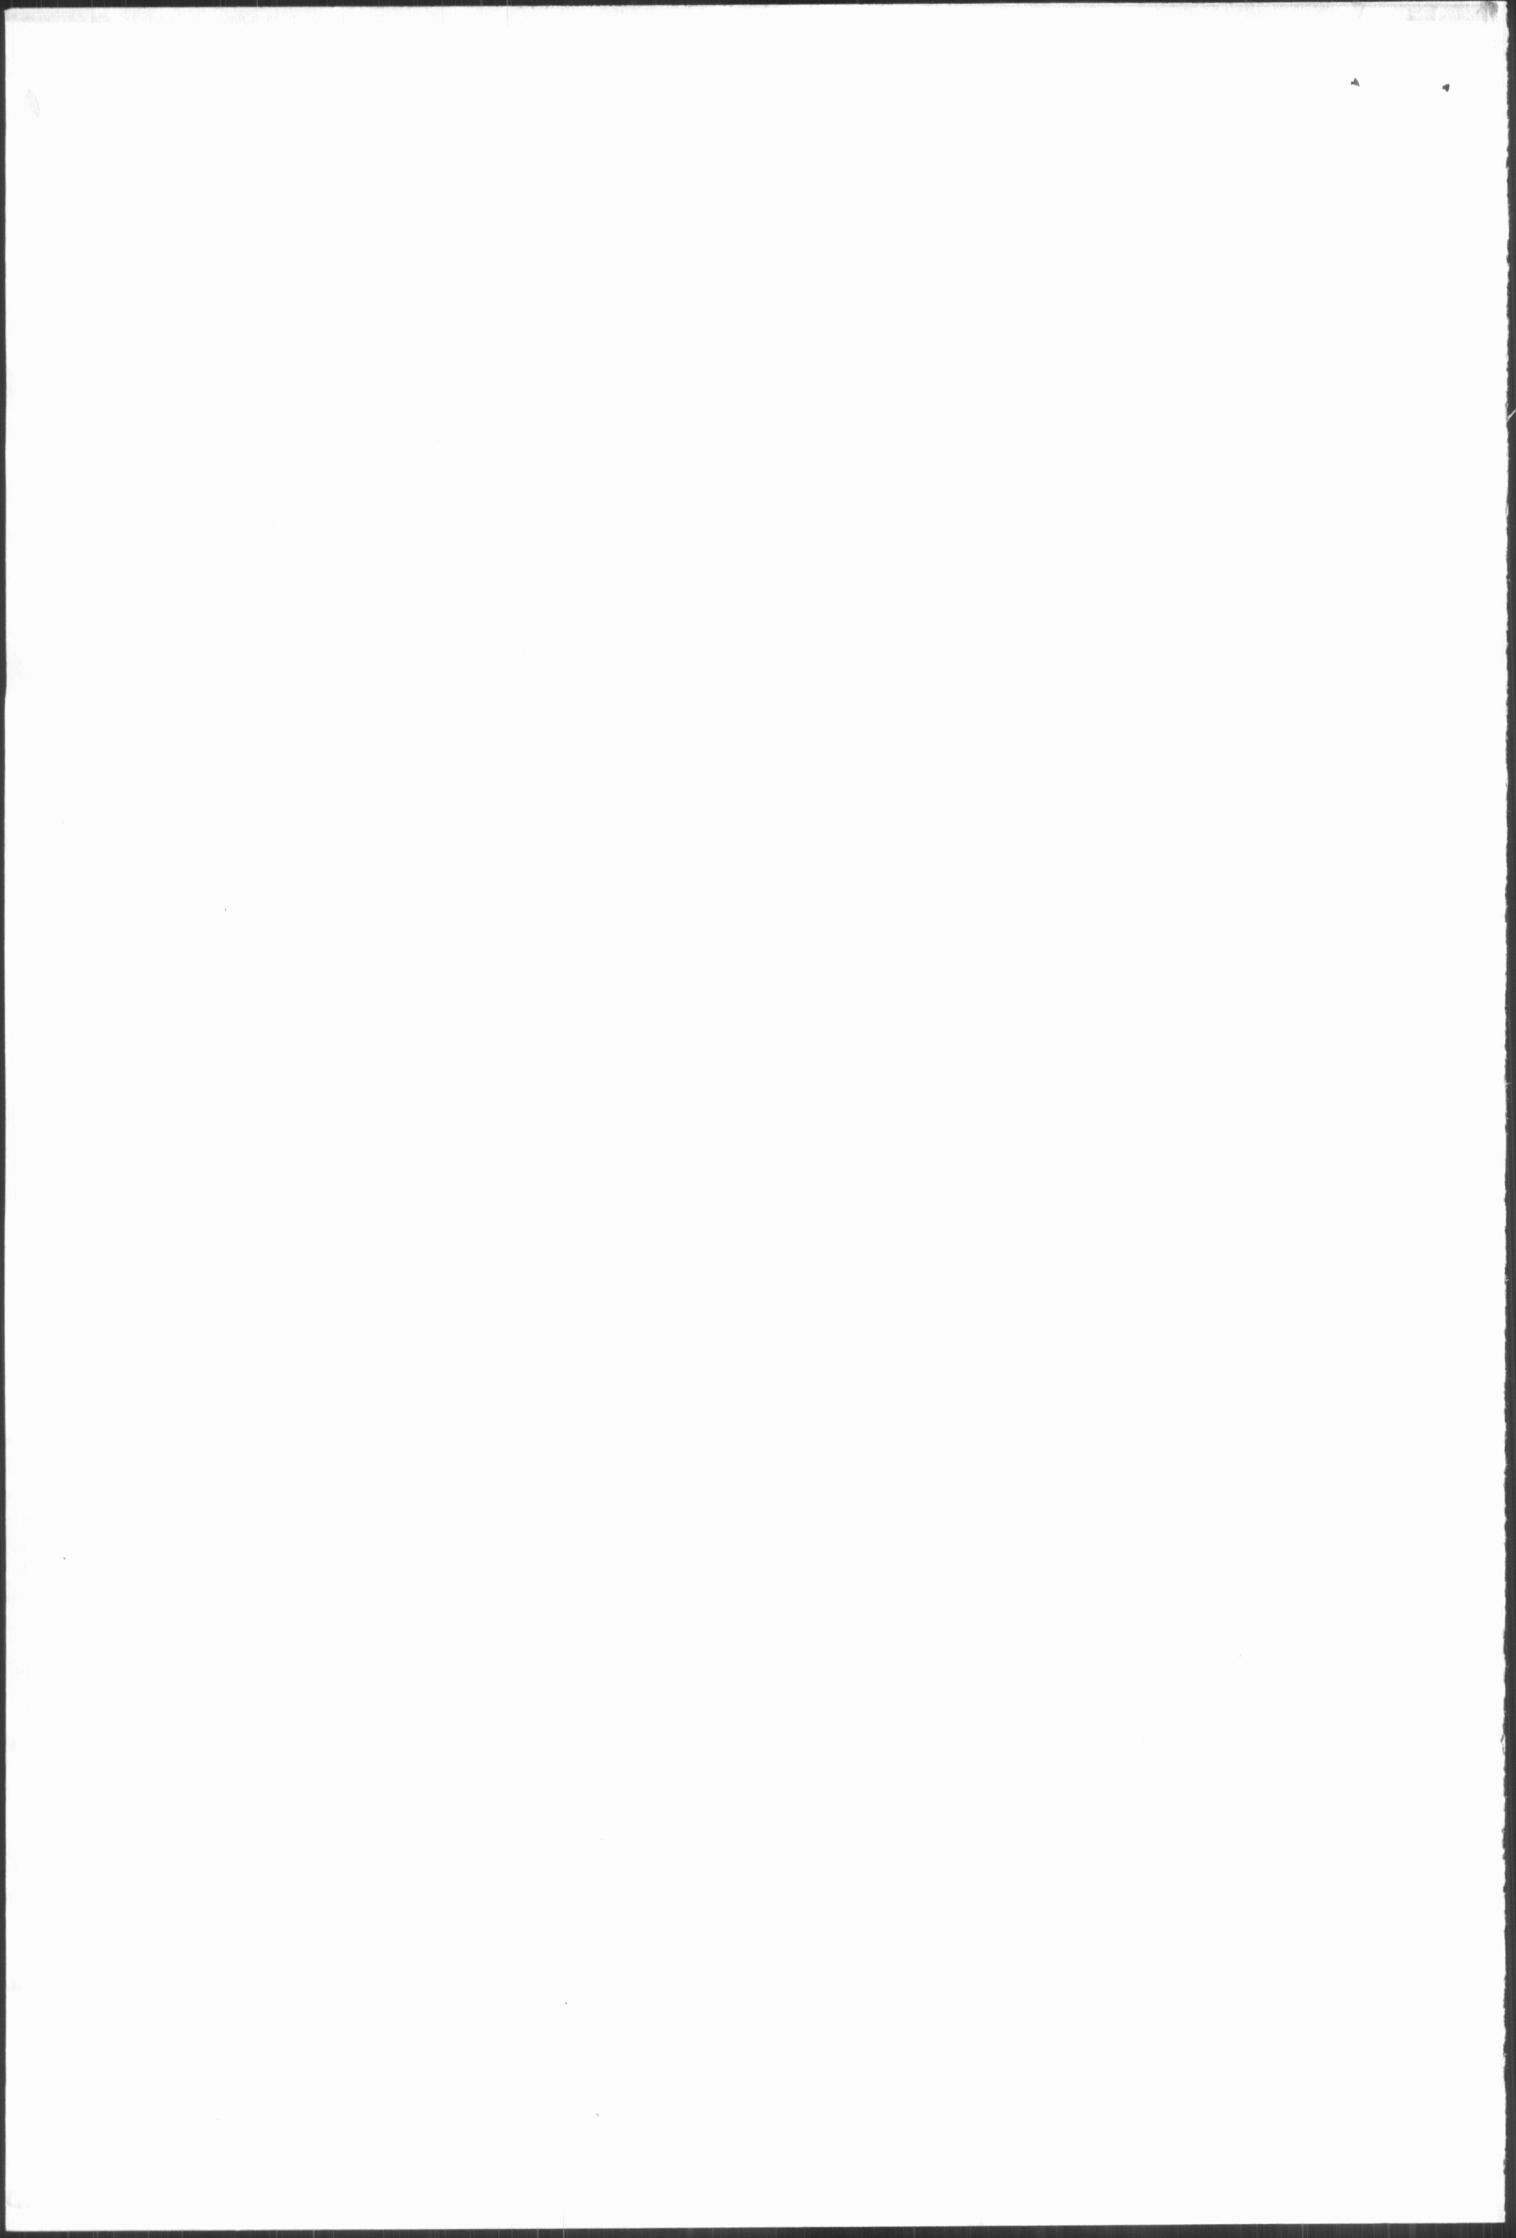

In addition to claims for work injuries, 1,145 claims were finalised in 1968-69 for occupational diseases. These claims covered 30,850 days of lost time through temporary disability, in addition to 49 fatalities and 51 cases of permanent disability. All but two of the fatalities resulted from diseases of the circulatory system. Of all occupational disease claims finalised, 602, or 53 per cent, were for diseases of the skin and subcutaneous tissue.

Explanatory Notes

In Queensland, workers' compensation insurance is confined solely to the State Government Insurance Office. An employer, by a policy with that Office, issued under the "Workers' Compensation Acts 1916 to 1966", indemnifies himself against all sums for which, in respect of injury to any worker employed by him, he may become legally liable by way of compensation or damages in relation to that injury. Claims made on the State Government Insurance Office are therefore the sole source of information on compensative industrial accidents.

Self-employed persons are not obliged to insure, hence a number of accidents to workers in primary industry and in the professions etc. are not recorded. Also, members of the Police Force and the Commonwealth Public Service, including the P.M.G.'s Department, are excluded by the provisions of the Act, and coverage is thereby restricted in the administrative and communications industries.

By definition, the scope of the collection is limited to include only those injured employees who lost at least a full shift from work as a result of the accident. Accidents occurring during recess periods or on the journey to or from work are not classified as industrial accidents, but some details of such accidents are presented in Table 16. In addition, details of persons who were compensated for a disease arising out of work or working environment appear in Tables 14, 15, and 16. Cases of occupational diseases precipitated or aggravated by some accidental event are classified to the antecedent work injury rather than to the disease.

Definitions

An Industrial Accident is defined as any compensated work injury or a compensated occupational disease causing death or permanent disability, or the temporary disability of the injured person during the entire interval corresponding to the hours of his or her regular shift on any one or more calendar days subsequent to the date of the injury.

Fatal injuries or diseases are so classified regardless of the time intervening between injury, or contraction of the disease, and death, providing that death occurs within three years of the intimation of the claim.

Permanent Disability is an injury or disease which does not cause death but results in the complete loss or loss of use of any member or part of a member of the body, or any permanent impairment of functions of the body or part thereof.

Temporary Disability is any injury or disease which does not result in death or permanent impairment, but renders the injured person unable to perform a regularly established job during the entire time interval corresponding to the hours of a full, regular shift.

Duration of Temporary Disability refers to the calendar days lost rather than to the actual number of working days lost.

Type of Accident is the event which directly resulted in the injury (i.e. the manner in which contact was made between the injured person and the object or substance causing the injury).

Agency Related to the Accident is the agency (i.e. working environment, production equipment, animal, etc.) which, because of its hazardous nature or condition, precipitated the event designated as the accident.
